ATLANTIC TRACK & TURNOUT CO.

The Year Was 1923... Calvin Coolidge was President of the United States. While the Twenties roared, our founder, John Barry, was quietly creating what would become Atlantic Track & Turnout Co. He received word from the "CINCINNATI" Frog & Switch Co. that "...effective November 1, 1923, and until further notice, we would be pleased to have you solicit the trade in the New York City district." Our first order was received in January 1924.

Since those early days, Atlantic Track & Turnout Co. has managed to adapt to an ever-changing business environment. The fast pace of modern business, tempered by the traditions of the past, places Atlantic Track at the forefront of what is now a world-wide market.

Single Source Solutions became a necessity as workforces were being scaled back and customers became increasingly dependent on suppliers. Atlantic Track responded by expanding our product offerings to fulfill our customers' need for a single-source supplier. This unique approach has allowed us to offer superior products at affordable prices, while providing our customers with one-stop shopping from purchase through ease of installation.

Sales "Plus" Every Atlantic Track employee is either directly or indirectly involved in sales. In addition, we are available for pre-project planning, on-site engineering, and final installation advice. Our technical specialists are at your disposal no matter how large or small the job. We will "Package Ship" the right material at the right time and on time.

Atlantic Track also welds, bends, cuts, drills, punches, etc., per your drawings at our various plants strategically located throughout the country. For this purpose, we have the most modern fabricating equipment available.

Sales "Plus" means experience, up-to-date facilities, comprehensive inventory, and unequalled service, which add greater value to what we sell.

Employee Ownership results in Customer Service at its best. The employee owners of Atlantic Track are committed to personalized service on every request.

Our Promise Atlantic Track promises the delivery of high-quality materials at competitive prices with the best guarantee in the industry. We guarantee that all materials are carefully inspected before they are shipped. Any material which is not as represented can be returned by you at no cost. Atlantic Track & Turnout Co. will pay the freight both ways.

TRANSIT

SYSTEMS

Atlantic Track's Transit Division was created in response to an ever-changing market place. We partnered with leading manufacturers to form a team of companies to supply a complete package of products to transit systems and the contractors who build them. Now, our transit customers can get a full line of products with the same quality and service that our other customers have come to expect from Atlantic Track.

We do more than just sell products... we sell solutions. Our goal is not only to sell the right products at the right price, but to provide them for the right reason.

Along with the third rail products illustrated in this catalog, Atlantic Track inventories every ASCE, AREA, ARA-A and ARA-B rail section that is presently produced throughout the world. We also offer a complete line of first quality relay rail, joint bars and tie plates. Complementing our inventory of rail and OTM is a full line of new and restored switch material from 132-lb. per yard to 80-lb. per yard AREA specifications.

The next time you need to think about the best solutions for transit systems... think of Atlantic Track.

Our Products

Contact Rail Atlantic Track offers a wide range of contact rail used for power transmission in transit systems from the traditional 150-lb. rail to the more advanced 85AS and 84C composite rail sections.

Insulators Whether you require molded fiberglass or porcelain, Atlantic Track has the right insulator for you.

Designs are available in various heights with different base designs and can accommodate the many types of contact rail currently in use. Atlantic Track will custom design and manufacture insulators to meet your specific requirements.

Coverboard Pultruded fiberglass coverboards come in many different shapes and sizes. While lightweight fiberglass coverboards are both strong and durable, UV protection can be added to give our coverboards even longer life when required. A wide range of engineering and testing services are available to ensure that your specific needs are met.

Brackets for holding the coverboards in place are available in designs to match the requirements of your third rail, coverboard and insulator system. Brackets can be manufactured with molded fiberglass or fabricated metal. Our transit specialists will work with your engineers to develop a bracket that is right for you.

Our Products

Grating and Hand Railing

Atlantic Track is a full-line supplier of fiberglass grating and hand railing.

Transit systems use Duragrid® fiberglass grating because it is anti-skid, non-corrosive, non-conductive and does not deform or warp. Fiberglass has high fatigue and impact resistance, does not chip and is non-sparking. It is also available with low smoke and low toxicity resins for added safety. Panels are pre-fabricated for easy installation.

Hand railing is available either round or square and is designed for easy installation. The Compositite® walkway (shown below in use by the MTA in Baltimore) is one example of the versatility of our fiberglass products.

Accessories

Atlantic Track supplies a complete line of third rail accessories. We custom design and manufacture shims, sleeves and collars to further insulate your third rail or standard rail system. These products are available in a range of materials, shapes, and sizes to meet even the most exacting specifications. We also offer expansion joints, anchor assemblies and end approaches designed to meet your requirements.

Other Products

Below is a list of some of the many products that we supply. We encourage you to contact one of our sales professionals for more information on any of our products.

Anchor Bolts	New Rail	Special Plates
Bumping Posts	Rail Clips	Spikes
Compromise Joints	Relay Rail	Tie Plates
Deraills	Rerails	Ties
Inserts	Restraining Rail	Track Tools
Insulated Joints	Rubber Flangeway Inserts	Turnouts
Joint Bars	Signs	Wheel Stops

Atlantic Track's full product publications give you a complete reference library on crane rail and tee rail systems.

THE CRANE RAIL BOOK illustrates every component necessary for a complete runway system. Our quick reference section, alone, will give you more information than all other catalogs combined. The remaining one hundred and nine pages provide detailed drawings, charts, and specifications on every component necessary for a runway system.

THE CRANE RAIL BOOK provides a comprehensive resource equal in quality to the in-depth service that has consistently been offered by Atlantic Track & Turnout Co. Now there is not only a single source for materials but also a single source for information.

THE SOURCEbook is our general catalog on tee rail, crane rail, railroad trackwork, transit trackwork and accessories for all applications. It is an everyday manual for purchasing, engineering and field personnel who are directly involved in our industry. It is also an excellent educational resource for one-time or first-time users of these products.

THE SOURCEbook presents information that is highly practical and fundamental to the industry. It is the most complete guide for identifying and purchasing rail, trackwork and accessories.

Please contact Atlantic Track to obtain one of our full product publications, as well as for additional information, product clarification and expert advice.
